

## OLD PRESCRIPTION FOR WEAK KIDNEYS

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfil the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy that I know of has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact that so many people claim, it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

The trouble with too much ego is that there's too little ego in it.

Wright's Indian Vegetable Pills contain nothing but vegetable ingredients, which act gently as a tonic and purgative by stimulation and not by irritation. Adv.

The fool killer should be removed from office for cause.

## No Substitute For Dodd's Kidney Pills.

That's Why Their Sale Has Increased  
Wonderfully for the Last  
Forty Years.

Don't accept a substitute for Dodd's when you know that if they didn't relieve and give permanent satisfaction they couldn't be selling to the same families for two generations. Thousands of users, who have saved themselves from the ravages of kidney troubles and Bright's Disease by the use of this famous old remedy, will accept nothing else. They know that upon the slightest backache, pain in the loins, stiffness in stooping or lifting, you must take warning and use Dodd's and Dodd's only.

You are protected by the name on the flat, round box—the name with the three D's for diseased, disordered and deranged kidneys. No article of similar name will do. Get your box today and start on the road to health. Druggists will gladly refund your money if not promptly relieved.

## PRACTICAL PLAN OUTLINED FOR KILLING AND DRESSING HOGS FOR SUPPLY OF MEAT

HOG HELD IN GOOD POSITION FOR STICKING.

(From the United States Department of Agriculture.)

Ordinarily it is not necessary to stun or shoot a hog before sticking, although this is done in some localities for humane reasons. If the hog is stuck without being stunned, he should be squarely on his back when stuck. Two men can reach under and grasp the legs on the opposite side of the body and with a quick jerk turn the hog over on his back. One man can stand astride the body with his legs just back of the hog's shoulders, taking a good grip on the forelegs. In this position the hog can be held in place while the other man does the sticking.

### Sticking.

A narrow, straight-bladed knife, eight inches long, serves very well for sticking a hog. The knife should be pointed directly toward the root of the tail and held in a line with the back bone. Thrust the knife in six or eight inches directly in front of the breastbone. The knife should be kept in a straight line so as not to stick a shoulder, causing blood to clot, which results in waste in trimming or a shoulder which keeps poorly. This severs the arteries in the neck and will insure better bleeding. Avoid sticking the heart, for if this is done the blood will not be pumped from the arteries. After sticking, the hog may be turned over on the side.

### Scalding and Scraping.

The handiest way of heating water for scalding is in a large caldron or a kettle built for scalding hogs and which is placed over a fire near the place of butchering. A barrel is the most convenient receptacle in which to scald a hog, unless the hog is too large for the barrel, in which case a tank must be used. Much of the heavy labor can be avoided by means of a hoist, such as a block and tackle, for lifting the hog in and out of the scalding vat or when hanging the hog for removing entrails.

If the water is heated in the house, it should be boiling when removed from the stove and carried to the barrel. At the time the hog is scalded the water should be at a temperature of 185 to 195 degrees F. If no thermometer is at hand, stick the finger into the water three times in rapid succession, and if it burns severely the third time the water is about right. If the water is too hot the hair is likely to set, causing even more trouble than if too cold. A teaspoonful of lye or a small shovelful of wood ashes added to every 30 gallons of water will aid in removing the scurf. After either one of these alkalis is added the water should be stirred thoroughly.

Insert the hog hook in the lower jaw, place the hog on the table and slide it into the barrel. The rear end of the hog is scalded first for the reason

that if the water is too hot and the hair sets it can be removed easier from the rear than from the fore part of the hog. The hog should be kept moving in the water to be sure that no part will rest against the side of the barrel. Occasionally the hog should be drawn out of the water to air, when the hair may be "tried."

Cut the skin about three or four inches long just below the hocks in both hind legs. Loosen the tendons and insert the gambrel. Be sure that both tendons in each leg are loosened before inserting the gambrel. Now scald the front part of the hog. After the front part of the hog is scalded pull it out on the table as before. Remove the hair and scurf from the ears, forelegs and head immediately, as these parts cool very quickly. Use the bell-shaped scraper to remove the remaining hair and scurf. If the hair fails to yield in any particular region, cover that portion with a gunny sack and pour on hot water. When most of the hair and scurf is removed pour hot water over the entire carcass and shave off, by means of a knife, the hair that is left. Hang up the hog and pour a bucketful of cold water over the carcass and scrape from the surface the remaining dirt and scurf.

### Removing Entrails.

After the hog is hung up and the surface is clean the next step is to remove the entrails. Cut through the midline, beginning at the top and continue cutting down to the head. Cut around the rectum on each side and pull it out between the pelvic bones.

Place the knife between the first and second fingers of the left hand, inserting the fingers where the opening has been made and with the right hand force the knife down to the breastbone. The fingers will serve as a guide in making the cut and protect the intestines from being cut. When this opening has been made remove the fat which surrounds the stomach, cutting the gullet as soon as it is drawn up far enough. Cut on each side of the tongue to loosen it and pull it out with an upward jerk. Now cut through the breastbone, beginning at the front end. Cut upward slightly to one side. Remove the pluck, which consists of the heart, lungs, gullet and windpipe, by cutting the diaphragm.

Cut down along the backbone and it will be easy to pull out the entire pluck. Put a piece of corncob or small block of wood in the hog's mouth so air can circulate. Wash out the inside of the carcass with cold water and a cloth. Take a stick about a foot or 18 inches long and spread open the sides, allowing a free circulation of air. To facilitate cooling, the head can be removed and the carcass split or sawed down the backbone. In splitting or sawing the carcass be careful to cut as near the mid-line as possible.

## FIRE PROTECTION ON FARMS

Plow Guards of One or More Furrows Around Fields to Shield Grain—Have Water Handy.

(Prepared by the United States Department of Agriculture.)

Fire guards of one or more furrows should be plowed around all fields of shocked or stacked grain, to prevent conflagrations starting from the sparks of locomotives, tractors, thrashing engines or from the careless use of matches, pipes or cigarettes. The exigency of the situation demands that farmers who previously have opposed furrowed fire guards now make practical application of this control. Farms also should have available fire-fighting equipment such as chemical extinguishers or barrels and buckets of water.

Precaution should also be exercised against "hot boxes" and other improperly adjusted machinery, which are possible sources of loss. Where possible every farm should be equipped with several chemical fire extinguishers, as these first aids in fire-fighting

are extremely valuable protection for the grain in the stack or bin, as well as for the farm buildings and other produce or live stock in storage or stable. If such extinguishers are deemed inadvisable, at least the farmer can have two or three large barrels of water and several buckets handy for emergency fire needs.

## UTILIZE ALL OF WINDFALLS

By Picking Up and Feeding to Hogs Much Trouble for Next Year Can Be Prevented.

By picking up and feeding to hogs or utilizing in other ways all of the apples that fall, much trouble for next year can be avoided. The larvae or worm form of the codling moth is often found in these, and if destroyed just that much is done towards producing better fruit next year. To produce good fruit one must be on the job all the time.

Straw Is Good for Land.

Straw is much more good for the land.

## Ice Boxes on Wheels

Refrigerator cars for carrying meat are ice boxes traveling on wheels.

Most people in America would have to go without fresh meat, or would have to pay more for what they could get, if it were not for these traveling ice boxes.

Gustavus F. Swift, the first Swift in the packing industry, saw the need of these traveling ice boxes before others.

He asked the railroads to build them. The railroads refused. They were equipped, and preferred to haul cattle rather than dressed beef.

So Gustavus F. Swift had to make the cars himself. The first one was a box car rigged up to hold ice. Now there are 7,000 Swift refrigerator cars. Each one is as fine an ice box as you have in your home.

Day and night, fair weather and foul, through heat and cold, these 7,000 cars go rolling up and down the country, keeping meat just right, on its way to you.

Thus another phase of Swift & Company's activities has grown to meet a need no one else could or would supply, in way that matched Swift & Company ideas of being useful.

When you see one of these Swift & Company cars in a train, or on a siding, you will be reminded of what is being done for you as the fruit of experience and a desire to serve.

### Cuticura Beauty Doctor

For cleansing and beautifying the skin, hands and hair, Cuticura Soap and Ointment afford the most effective preparations. For free samples address, "Cuticura, Dept. X, Boston." At druggists and by mail. Soap 25c, Ointment 25c and 50c.—Adv.

Utah's 1917 metallic production was valued at \$96,323,000.

## TOO WEAK TO FIGHT

The "Come-back" man was really never down-and-out. His weakened condition because of overwork, lack of exercise, improper eating and living demands stimulation to satisfy the cry for a health-giving appetite and the refreshing sleep essential to strength. GOLD MEDAL Haarlem Oil Capsules, the National Remedy of Holland, will do the work. They are wonderful. Three of these capsules each day will put a man on his feet before he knows it; whether his trouble comes from uric acid poisoning, the kidneys, gravel or stone in the bladder, stomach derangement or other ailments that befall the overzealous American. The best known, most reliable remedy for these troubles is GOLD MEDAL Haarlem Oil Capsules. This remedy has stood the test for more than 200 years since its discovery in the ancient laboratories in Holland. It acts directly and gives relief at once. Don't wait until you are entirely down-and-out, but take them today. Your druggist will gladly refund your money if they do not help you. Accept no substitutes. Look for the name GOLD MEDAL on every box, three sizes. They are the pure, original, imported Haarlem Oil Capsules.—Adv.
